Cover Component

Remove the cover component by loosening the three locking screws with the included hex wrench.

Use the position indicated on the position sticker to drill the holes needed to mount the camera base. Insert the expansion bolt into the holes. Match the base's mount openings to the expansion bolts position, then place the mounting screws through the base's mount opening into the expansion bolt. Tighten the mounting screws to ensure the camera base mounted securely.

Completion of Installation

- ⊠ Place the cover component back onto the base.
- ⊠ Please make sure the locking screw position on the cover component matches the locking post on the base.
- ⊠ Tighten the locking screws after the cover component is in the correct position.
